Capability Statement

Making AI and automated decisions traceable, review-ready, and governable.

Cedar Fort Digital helps organizations govern AI, automated workflows, and high-impact decision systems. We make decisions traceable, explainable, and audit-ready—without replacing existing technology.

CORE COMPETENCIES

- AI Governance through our Governance by Design™ Framework
- Deterministic decision traceability and continuous evidence generation
- Audit readiness and immutable evidence automation — regulator exam-ready 365
- Vendor and third-party AI oversight
- Agile audit transformation and operating model modernization
- Workforce upskilling, not replacing
- Non-intrusive integration — no rip-and-replace

KEY DIFFERENTIATORS

- Human-in-the-loop, elevating professional judgement
- Stronghold™ has been mapped at requirement level against five major regulatory frameworks: IIA 2025 Global Standards, ISO/IEC 42001, NIST AI Risk Management Framework, NIST SP 800-53, NIST SP 800-161
- Microsoft for Startups — Azure-native architecture in South Central US, enterprise- and government-grade security posture
- Section 508 / WCAG 2.1 AA tested
- Seven provisional patents filed
- Practitioners with extensive, hands-on and senior level experience inside the institutions we serve

Rachel Latham, Architect of Governance by Design™ and the Stronghold™ Governance Operations Suite. 25+ years across financial services, healthcare, pharmaceutical, and telecommunications. Contributed to AUC/EIR authentication systems for the original GSM security standard at Sema Group, working with the Oxford GSM Committee. She was also a process thought leader and co-developer of the Global Operating Model for Citi Group's SEPG.

Chris Soskin, Chief Transformation Officer. Creator of the Agile Audit methodology at Deloitte, now adopted across the profession. Foundational contributor to Toyota's transformation to the Rational Unified Process; contributing author and editor of the Addison-Wesley process engineering series. Chris has led multiple top tier regulated institutions through agile audit and software transformations.

Making AI and automated decisions traceable, review-ready, and governable.
