Federal and Government

This section needs to be updated so that it contains all of the following information, such that it doesn't duplicate anything that's already there. If that is too difficult, just keep the hero and put this instead:

Cedar Fort Digital is a registered federal contractor with active SAM.gov registration and CAGE code, pursuing EDWOSB certification. We support federal governance requirements across civilian agencies, defense-adjacent organizations, and federally regulated industries — spanning AI systems, automated decision workflows, and any consequential decision system subject to federal examination.

Federal Contractor Credentials

Item	Detail
Entity Name	CEDAR FORT DIGITAL INC.
Unique Entity ID (UEI)	UWYLQN51E9A8
CAGE Code	1AXT5
SAM.gov Status	Active
EDWOSB Certification	Application in progress
Business Type	Woman-Owned Small Business, Florida S-Corporation
Headquarters	Green Cove Springs, Clay County, Florida

Federal Governance Frameworks Supported

- ◆ NIST AI Risk Management Framework (AI RMF)
- ◆ NIST Special Publication 800-53 Rev 5
- ◆ NIST SP 800-161 Supply Chain Risk Management
- ◆ Executive Order 14110 on Safe, Secure, and Trustworthy AI
- ◆ OMB Memorandum M-24-10
- ◆ NIST Center for AI Standards and Innovation (CAISI)
- ◆ DoD AI Ethics Principles

- ◆ SAE EIA-649 Configuration Management
- ◆ FedRAMP-aligned security architecture

Section 508 Accessibility

Cedar Fort Digital is committed to full Section 508 compliance for all Stronghold™ deployments serving federal agencies. Section 508 accessibility testing and WCAG audit services are available through our accessibility consulting partner. Testing is currently underway on the Stronghold™ platform.

Stronghold Core™

We built Stronghold™ to be secure because we have spent our careers inside the institutions it is designed to protect.

Cedar Fort Digital was founded on a premise that most governance technology companies miss: governance failure is not a tool problem. It is an architecture problem. Governance that exists as a supervisory layer applied after the fact will always lag behind the operations it is supposed to govern — and that gap becomes catastrophic when those operations run at the speed of AI and automated systems.

We designed Stronghold™ from first principles to make governance structural, not supervisory. We built it for AI because AI is where the crisis is most urgent. The architecture governs any consequential decision system — because the underlying problem was never specific to AI. It was always about governance at operating speed.

Stronghold™ is a non-intrusive AI governance layer that sits alongside your existing systems — a system-agnostic passive observer and active guardrail. It ingests telemetry from your existing agents and platforms to provide continuous oversight without interfering with production logic or performance.

Key Features

- Patented Pattern Object Model with 15 risk dimensions including Control Execution Integrity, SoD Drift, and Behavioral Risk Signatures.
- If you license Stronghold Sentinel™, you get 7 additional risk patterns, reports and more
- WORM-immutable artifact vault for forensic-ready regulatory evidence preservation.
- Real-time signal classification and determination routing through five specialized assurance roles
- Enterprise grade Postgre database with row-level security.
- Multi-tenant architecture for complex holding company and subsidiary structures

- Straightforward white-labelling that can be done by your administrator right in the application, in just a few minutes, the application becomes yours.
- This is a secure enterprise AI system built entirely on the Azure platform, by Microsoft Startup Hub partners, this is the stack:

Azure Static Web Apps	Azure Blob Storage (WORM vault)
Azure PostgreSQL (35 tables)	Azure Entra ID
Azure Functions (12 managed, 60+ actions)	Azure Communication Services
Intelligence Engine Built in Azure AI Foundry	Azure Blob Storage (WORM vault)

The Team

Please replace the bios that are there with these bios:

Rachel Latham — Founder & CEO

Rachel brings more than 25 years of VP-level experience in software architecture, process engineering, and enterprise transformation at institutions including Citigroup Global Consumer Technology, JP Morgan Corporate Bank, Freddie Mac, Fidelity, Wells Fargo, Florida Blue, and Amgen, alongside telecommunications experience including participation in the Oxford GSM Committee on AUC/EIR security standards in the 1990s. She has firsthand experience taking a governance framework from working group to global adoption. Rachel is the sole architect of the Assurance by Design™ framework, the Stronghold™ platform, and all six provisional patent applications.

Chris Soskin — Chief Transformation Officer

Chris developed the first Agile Audit methodology at Deloitte — a market-defining innovation that transformed internal audit practice before being widely adopted across the profession. His expertise spans New York Life, Anthem, Toyota, and multiple financial services and technology engagements. At Cedar Fort Digital, Chris leads the consulting practice and Human Factor Framework™ implementation, helping organizations navigate the cultural and operational shifts required for accountable governance at scale.

Lex Banks — Accessibility and AI Ethics Partner

Lex is a federal IT audit and compliance professional with deep expertise in preparing government agencies for technology examinations. She specializes in Section 508 accessibility compliance testing, WCAG audit services, and AI ethics — bringing a practitioner's perspective shaped by years of hands-on federal IT governance work. Lex contributes thought leadership to AI ethics discussions within the government technology community and is transitioning her expertise into independent consulting practice. At Cedar Fort Digital, Lex advises on accessibility compliance for Stronghold™ deployments and

supports clients navigating federal accessibility and requirements and any ethics issues with which she can assist.

Implementation Partner Network

Cedar Fort Digital maintains a curated network of Big 4 and boutique consulting partners with deep regulated industry experience, available for enterprise Stronghold™ implementations across financial services, insurance, healthcare, and government sectors.

We can make our company profile more concise, perhaps:
